ABOUT US

Hail is a simple transport and logistics assist platform. Hail logistics is a module aimed at improving the logistic industry. Aiding pre-existing logistic companies go digital, by providing a user friendly platform. Which connects users easily to logistics services. By creating this connection, logistics companies would increase accessibility, speed, customer experience and customer satisfaction .

OUR MISSION

IMPROVE DISPATCHING

Proactively manage and maximize dispatching and routing operations with our transport and logistic platform. Improved dispatching would aid the speed and accuracy in "pick-up" and "drop off" time. By doing this your organization would save time which will yeild better customer satisfaction.

INCREASING PRODUCTIVTY

Get task done faster and more proactively. Monitor your riders and make sure they are performing all their task. Increase in productivity yields better returns on investment.

BETTER CUSTOMER EXPERIENCE

Improve response time by dispatching assets closets to you. Your riders would also share the estimated time of "pick-up" and "drop-off" aiding customer to track goods easily.By doing your organization would Increase it's customer satifaction rates.

USER APPLICATION

Hail user application is your simple transport and logistics assist platform. Where users can request for pick-up and drop- off of goods and services.
